

SUSTAINABILITY AND SAFETY IN OIL & GAS

Bureau Veritas' services help maintain quality and integrity, minimize environmental impact, prevent incidents and protect people and local communities throughout the life of the asset.

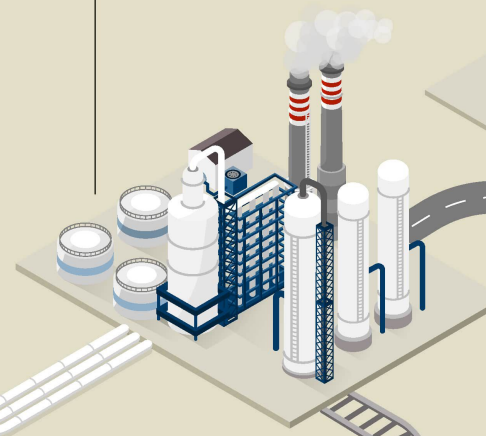

PRODUCTION

We implement solutions for monitoring, controlling and eliminating emissions, and help energy providers worldwide move towards sustainable production.

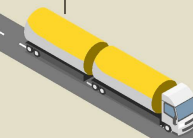

PROCESSING & REFINING

We work to protect personal data and ensure cyber security, and help achieve HSE and performance targets via collaborative digital platforms.

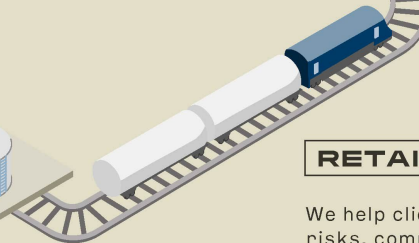

DISTRIBUTION

We promote the use of gas and waste plastics as feedstock.

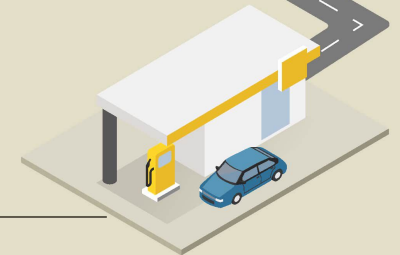

TRANSPORTATION

Our expertise along the gas value chain positions us as an energy transition partner. Our experience in asset integrity management helps mitigate environmental and operational risks.

RETAIL

We help clients assess health risks, comply with hygiene regulations and reassure employees and customers during restart and day-to-day operations.

EXPLORATION

We partner with our clients worldwide to build and maintain safe, reliable and efficient assets in complex environments onshore and offshore.
